General Information

- Plan ahead to ensure that required courses, usually offered once a year, will be completed on time to graduate. Elective scheduling may change from year to year. *Some elective courses are offered every other year.*
- See Time Schedule at <http://www.washington.edu/students/timeschd/> for days/times of classes, whether an add code is required, and the add code contact. Courses with “>” before the 5 digit SLN number require an add code.

¹Prior Degrees and Prior Credits.

- To waive a specific course, students must complete the appropriate waiver form in the [Catalyst dropbox](#) for your degree. EPI 512-3, EPI 584 and EPI 800 may not be waived.
- For a completed, health-related master’s degree from another UW department or another university, up to 30 unspecified credits may be waived from the 90 required credits, reducing the minimum credits required to 60. To waive a required course, a completed waiver form is necessary. Only UW credits may count toward the required 18 graded, graduate credits and the required 60 credits.
- For an MPH/MS in Epidemiology completed at the UW, all credits count toward the Epi PhD. These credits may count toward the required 18 graded, graduate credits.
- For additional courses from a non-Epidemiology, UW public-health-related master’s degree to count toward the 60 minimum credits, students must petition the Epi Graduate Program Director, and the Dean of the Graduate School. Approval is not always granted.
- Up to 12 applicable, UW Graduate Non-Matriculated (GNM) course credits graded 3.0 or above may count toward the PhD. No courses completed as a regular (non-GNM) Non-Matriculated student may count toward the degree, although students will not have to retake such courses if they earned a 3.0 grade or higher.
- **These courses do not count toward a degree in Epidemiology:** Any courses below the 500 level; EPI 500, EPI 511; HUBIO 530; BIOST 502-503, BIOST 508, BIOST 511-13 *when taken in addition to* BIOST 517-18; undergraduate research or internship; courses taken to complete a degree program at another department/university; courses for which waivers were granted; and courses unrelated to health.

²**BIOST 511-513** may be substituted for BOST 517-518 for those with minimal statistical background, or for those who completed this series prior to entering the Epi PhD program.

³**BIOST 536-7** must be taken in residence. The online version is not accepted for the PhD.

⁴Approved EPI Electives can be found in the Epi Course Planning Sheet on the [Epi Courses](#) webpage.

⁵**School of Public Health (SPH) Electives** may include Epidemiology courses, courses from other departments at SPH, or other UW courses with substantial public health content. EPI 505 and 547 may count as SPH electives but not EPI electives. EPI 583, 591, 593, 595, 600, 700, 800, and one-credit courses cannot be counted toward Epi or SPH electives, only toward total degree credits.
